Remove all parts and hardware from the box and lay out on a clear carpeted or scratch-free work surface. (The shipping box provides an ideal work surface), this will avoid damaging any parts during assembly. Do not dispose of any contents until assembly is completed to avoid accidentally discarding small parts or hardware.

Two people recommended for ease of assembly.

Use the parts and hardware lists to identify and separate each of the pieces included prior to starting assembly.

The illustrations provided allow for easier assembly when used in conjunction with the assembly instructions.

Note: Do not fully tighten all bolts until all parts are in place. Failure to follow these instructions may cause the bolts to misalign during assembly.

If using power tools to aid in assembly please use caution. Power tools can damage hardware or split wood.

NOTE: Side rails have (2) settings:

Use the higher setting if not using a box spring mattress and/of if a trundle will be used with the bed.

Use the lower setting if using a mattress & box spring. We recommend a box spring if you want to use a bed skirt/box spring cover or add height to the bed.

Our beds do not require a box spring at either setting since they include a slat roll foundation system, but one may be used.

PARTS REQUIRED:

A - Headboard (1)
B - Footboard (1)
C - Side rail (2)
D - Slat Support (1)
E – Support Leg (3)
F – Slat Roll (1)
TOOLS INCLUDED:
Phillips Head Screw driver (not included)

HARDWARE INCLUDED:
G – Large Phillips Head Screws (x28)
H – Small Phillips Head Screws (x12)
I – “L” Shape Slat Bracket (x2)

ASSEMBLY:
1. Hold side rail (C) up to slots on the legs of the headboard (A) and insert the hooks of each side rail into the slots. Push down firmly on the top of side rails until they slot themselves over the pins inside the leg as shown.
2. Repeat the same procedure with the footboard (B).
3. Install the (I) “L” Shape Slat Bracket into the headboard and footboard by inserting the (H) small Phillips head screw as shown.
4. The Shape Slat Bracket (I) is adjustable to 3 locations, location I1 & I3 is for trundle (depending on which side you will use the trundle on) and location I2 is for use without trundle.
5. Screw (E) Support Legs into the (D) Slat support and sure all are tight.
6. Align (D) Slat support on (I) “L” Shape Slat bracket using the (H) Small Phillips head screw. Place slat support onto the slat bracket away from the side the trundle will roll out towards.

7. Lay the (F) slat roll in between the (C) side rails and use (G) Large Phillips head screws to fasten slats to the side rails with the Phillips head screwdriver.
8. Retighten all bolts and screws to make sure all are tight and bed structure is rigid. It is recommended all bolts and screws be checked from time to time for safety.
